

MONITOR AND PROTECT YOUR HOME FROM LEAKS

Smart Leak Detector

The Smart Leak Detector provides peace of mind by monitoring for moisture and water outside of pipes, notifying you when there is a problem. It can be used as a stand-alone sensor or combined with the Flo® Smart Water Monitor and Shutoff for whole-home protection.

WHY?

Moen exists to help people discover, improve and customize their relationship with water.

What is a Smart Leak Detector?

The Smart Leak Detector is a 3.5-inch, drop-shaped, battery-powered unit that mounts on the wall and comes with a 48-inch cord and sensing disc that can be placed in hard-to-reach areas. It monitors for water, moisture, humidity or extreme temperatures.

The Smart Leak Detector is ideal for almost anywhere moisture can be a problem, such as basements and laundry rooms, as well as hard-to-reach locations, like under sinks or behind toilets or appliances.

Why do homeowners need one?

Visibility and Reassurance: Homeowners may not notice that water is accumulating in remote areas, or they may be away from home when a water event occurs.

Proactive Protection: The Smart Leak Detector mitigates the risk of water damage by giving homeowners the opportunity to proactively address situations where water has been detected outside of pipes.

How does it work?

When the Smart Leak Detector detects the presence of water or moisture, extreme temperatures or high humidity, it sounds an audible alarm and flashes an LED light. It can also send customizable notifications through the Moen Smart Water App.

You can place as many Smart Leak Detectors in the home as you'd like. If the home is equipped with the Flo Smart Water Monitor and Shutoff, the Smart Leak Detector can be set up to automatically trigger the shutoff feature and protect the home from water damage.

920-004 Smart Leak Detector, 1-Pack
920-005 Smart Leak Detector, 3-Pack

920-006 Smart Leak Detector
6-Foot Leak Sensing Cable

KEY BENEFITS

Water and Moisture Detection – The Smart Leak Detector notifies you if it detects water or moisture outside of the pipes – for example, from flooding or a malfunctioning appliance – reducing the risk of water damage.

Humidity and Temperature Monitoring – The Smart Leak Detector monitors for humidity and temperature and will alert you if they fall outside of a certain range, which you can set on the Moen Smart Water App.

Monitoring in Difficult-to-Reach Areas – The Smart Leak Detector comes with a 48-inch cord and sensing disc that can reach to remote or tight locations under or behind appliances, in laundry rooms, basements or attics.

Smartphone Communication – The Smart Leak Detector connects to the Moen Smart Water App, enabling you to check on the status of your leak detectors and receive notifications if there is a problem. Available Q3 2022.

Whole-Home Protection – Through the Moen Smart Water App, the Smart Leak Detector can be connected to the Flo Smart Water Monitor and Shutoff so water to the whole house can be shut off automatically if a leak is detected.

Customizable Notifications – The Moen Smart Water App allows you to customize the way your Smart Leak Detector notifies you when there is a problem – by text, phone call, email and/or through the App itself. There is also an optional low-battery warning.

Extendable Range – The Smart Water App can be paired with a 6-foot leak-sensing cable (sold separately) that monitors for moisture along its whole length. You can connect up to three cables to one Smart Leak Detector.
