

**MOEN®**

Water is Wonder

Water is both muse and medium. It has the power to shift our perspective by unveiling new ways to see the world around us. Through refracted light, boundless movement, and responsive energy, it is a catalyst for creativity and innovation.

At times, water's malleable beauty forms a rushing sensation, surfacing an immediate vision of inspiration. Other times, it is pooled and reflective, a quiet calm of nourishing observation. Always, water is a source of connection. As it joins rivers to oceans, rain to new growth, it flows through all life.

At Moen®, we celebrate this togetherness by filling up our cups in the kinship of others. Water is an agent of surprise, joy, comfort, and purity. Water is wonder.

Kitchen

# Kitchen Collections

A stream of water flows through a kitchen faucet and is transformed. It has the power to keep us clean, to refresh and sustain us, and to play a role in decades-old family recipes. Moen innovations make each interaction with water more beautiful, from flowing, filtered water that keeps families healthy, to connected technologies that make every moment more customized and convenient.

Mission Moen is our promise to protect and preserve our world's most precious resource – from the water that runs through our fixtures, to the streams, rivers, and oceans of the natural world. It includes our commitment to save one trillion gallons of water over the next decade through products and innovations, as well as repurpose at least 2,000 tons of recycled ocean plastic to help the environment.
